Raximjon Tulaganov — Resume

Frontend / Full-Stack Developer — React · Next.js · TypeScript · Node.js

Qarshi, Uzbekistan · Open to remote · +998 97 804 06 23 · Telegram · GitHub · LinkedIn · raximjon.uz

Summary

Frontend-focused full-stack developer building production web apps with React, Next.js and TypeScript. Shipped a live e-commerce + ERP monorepo platform (Urtak) and a multilingual news portal with an admin panel (Migrantlar24). Comfortable owning a feature end to end: UI, API integration, auth, state, and the backend pieces behind it. Uses Claude Code, Cursor and ChatGPT daily, and reviews and tests every generated change before it ships.

Skills

- **Frontend:** JavaScript (ES6+), TypeScript, React 19, Next.js 15 (App Router, i18n), HTML5, CSS3, Tailwind CSS, SCSS, Ant Design, Framer Motion, responsive and pixel-perfect layout
- **State & data:** TanStack Query, Redux Toolkit, Zustand, Context API, React Hook Form, Axios with interceptors
- **Auth & API:** REST API integration, JWT access/refresh flow, role-based routing and permissions, error handling layers
- **Backend & databases:** Node.js, NestJS, Cloudflare Workers, PostgreSQL, Prisma, Cloudflare D1 (SQL), Telegram Bot API
- **Architecture & tooling:** Turborepo + pnpm monorepos, shared UI packages, Vite, code splitting, Lighthouse / Core Web Vitals, SEO (JSON-LD, Search Console)
- **DevOps:** Git & GitHub (branching, PR review), Docker, Docker Compose, Nginx reverse proxy, Cloudflare DNS/CDN, Vercel
- **AI-assisted development:** Claude Code, Cursor, ChatGPT — spec-first prompting, reviewing and testing generated code

Experience

Freelance Frontend / Full-Stack Developer — Remote · Nov 2025 – Present

- Build and maintain production apps for several clients: Urtak (e-commerce + ERP), Migrantlar24 (news portal + admin), EduShareUz, ilxombegimqulov.uz.

- Take features from spec to release: component design, REST API integration, auth and roles, forms and validation, deployment.
- Set up Turborepo + pnpm monorepos with shared UI packages, so several apps share one design system.
- Refactor and debug existing code; review AI-generated changes before merging.

Frontend Developer Intern · Aug 2025 – Sep 2025

- Built React components and pages in a team codebase using a Git branching and code-review workflow.

Selected projects

Urtak — E-commerce & ERP platform · urtak.uz

- Uzbek-language storefront plus internal management system: three apps in one Turborepo + pnpm workspace.
- Shared component library and API layer across apps; role-based access for staff panels.

Migrantlar24 — Multilingual news portal & distribution admin · migrantlar24.com

- Next.js 15 portal in four locales (uz, oz, ru, en), mobile-first, with its own design system.
- Admin panel in React + Vite + TypeScript + Ant Design + Zustand, with wizards for Telegram, web and video publishing.
- Integrating social platform APIs (Facebook Pages, TikTok) for automated cross-posting.

Telegram audio search bot — Cloudflare Workers + D1

- Serverless bot with category search and an admin flow to add, edit and delete clips; ~2,500 users.
- SQL schema on Cloudflare D1, media stored in a Telegram channel, zero server maintenance.

ilxombegimqulov.uz — Personal brand site · ilxombegimqulov.uz

- Three-language site with full technical SEO: JSON-LD, Core Web Vitals tuning, Search Console setup.

Education & languages

- **Qarshi State University** — B.Sc. Accounting, 2026 – present
- **Frontend mentorship** — Javohir Jumayev, 2025

- **Languages:** Uzbek (native), English (B1, working proficiency for documentation and written communication)
